

## TECHNICAL IMPROVEMENT PROGRAM

### Automatic Operation – Aerate & Jog Cycle

#### ● Free Up Your Operators with Automatic Operation

TIP-10034

#### Machine Model for the Improvement:

All Load Handling Equipment

#### Description of Improvement:

With this option the machine will automatically do a full cycle from un-clamping, to jogging and aligning, to reclamping loads from the 90° position or the jogging position.

#### Reasons for this Improvement and Benefits:

Increase profitability by freeing up your operators and reducing manual labor.

- **Without Automatic Operation**, the operator is required throughout the entire machine cycle.
- **With Automatic Operation**, a simple push button is all that is necessary to get the machine to complete a full cycle. The operator is then freed up for other duties.

#### Prerequisites:

Programming updates are necessary for this TIP.

#### Requirements:

Installation: 1 day
